Finals LAB TASK 5: CRUD CLI using Python and MySQL

Problem:

1. Make sure you have installed the following pre-requisites before proceeding:
 - a. Mysql-connector
 - b. Mysql-connector-python
 - c. Xampp is running along with Apache and Mysql in the background
2. Create the following database in Mysql;
 - a. Database name: **moviesDB** with the ff: fields:

movie_id	int(10) Primary Key
title	varchar(50) NOT NULL
main_actor	varchar(50) NOT NULL
director	varchar(50) NOT NULL
genre	varchar(25) NOT NULL
gross_sales	float
ratings	(G, PG, R13, R16,X) varchar(5)
 - b. Insert at least 5 records
 - c. Create a user named **test_user** and assign a **password** and give it an admin access by checking necessary SQL functions
3. Guided by the Demo code attached in this task. test_DemoDB.py
4. Kindly continue working on the code that will allow the user to navigate through the Database and perform simple CRUD operations. Follow the following **CLI Menu**

Options:

```
----- MOVIE DATABASE CLI -----
1. Add Movie
2. View Movies
3. Update Movies
4. Delete a Movie
5. Search a Movie
6. Display Total Records
7. Exit
Select an option (1-6): |
```

5. The user should be able perform the ff. in your program.

MOVIE DATABASE CRUD APP

- 1- Add New Record
 - 2- View all records,
 - 3- Update a Record and show the updates,
 - 4- Delete a record
 - 5- **Search A Record**
 - 6- Display **Total Numbers** of Movies stored in the database
 - 7- Exit
6. For additional challenge, Task – You are to add a **SEARCH option** in the MENU that will allow the user to search by Name or emp_id, then display the information about the record being search. You may use Like statement and fetchOne method in my SQL to do this,
7. You are also going to add a method that will display the the **total number of records** in your database – You may use SQL count statement for this.
8. What to submit:
- a. UI Menu
 - b. Sample Output
 - c. Source Code
 - d. Exported sql file

Sample Code:

```
1 import mysql.connector
2 from mysql.connector import Error
3
4 6 usages
5 def create_connection():
6     try:
7         conn = mysql.connector.connect(
8             host="localhost",
9             user="test_user",
10            password="your_password_here",
11            database="moviesDB"
12        )
13        return conn
14    except Error as e:
15        print("Error while connecting to MySQL:", e)
16
